

<b>Company Name and Contact Details:</b>	
NZ Ester Fuels Andre' Hamman - Managing Director www.nzef.co.nz andre@nzef.co.nz +64 274 720 964	
<p>New Zealand Ester Fuels Ltd is a Biodiesel manufacturing company that was created to culminate a 2 year preparation period of business planning and process development. A decision to commence construction was made in February 2008.</p> <p>A salient feature of the process design is that the plant has neither a fresh water nor a trade waste connection. The use of the Magnesol™ Dry Wash technique allows for the process to be totally water free, thus having a negligible environmental footprint. All fats &amp; oil feedstock used in the process are sourced from sustainable origins. The NZEF facility is designed to process a wide range of feedstocks. Key components of plant are computer controlled with online instrumentation for quality management.</p> <p>The plant design includes a range of process safety features that are commonly deployed in hazardous area applications. Following 200 days of construction, the plant commissioning was successfully completed during November 2008. We are now committed to preferentially distribute our product to applications that result in a discerning performance difference.</p> <p><b>The NZEF team</b> represents a unique combination of diverse and complementary skills and is characterized by strong comradeship and a desire to succeed. Key players in the team as follows:</p> <p><b>John Zamick</b> - Alternative Director, spent 25 years in both small and large enterprises, mainly in the IT industry but also in the leisure and restaurant business. Over the last four years, John's focus has shifted to Renewable Energy. In the last 14 years, John has founded and run six businesses in the UK, the US and New Zealand including Extraxi Ltd (<a href="http://www.extraxi.com">www.extraxi.com</a>), IP-Performance Ltd (<a href="http://www.ip-performance.co.uk">www.ip-performance.co.uk</a>), BioFuelBox Inc (<a href="http://www.biofuelbox.com">www.biofuelbox.com</a>). One earlier startup, an Internet software company, was acquired by Cisco Systems Inc (<a href="http://www.cisco.com">www.cisco.com</a>) in 1997 and the product developed is still one of their most successful software applications. John's background is sales and marketing but backed by a strong technical bent - all of the startups have been focused on commercialising emerging technologies.</p> <p><b>Andre' Hamman</b> – Managing Director NZEF, a chemical engineer with over 25 years experience within heavy industry, mostly in the Pulp &amp; Paper sector. Andre has provided leadership to teams within the operations and maintenance, technical and environment areas.</p>	<b>Core Skill(s):</b>
	<ul style="list-style-type: none"> <li>• Production Technology</li> <li>• Plant Design &amp; Fabrication</li> <li>• Plant Construction &amp; Commissioning</li> <li>• Development of innovative pilot scale concepts to industrial scale operation</li> </ul>
	<b>Biofuel Focus:</b>
	<ul style="list-style-type: none"> <li>• 1<sup>st</sup> Generation coupled with process intensification techniques</li> <li>• Sustainable Biodiesel manufacture</li> </ul>
	<b>Core Product/Activity:</b>
	<ul style="list-style-type: none"> <li>• Biodiesel (Used Cooking Oil &amp; Tallow)</li> <li>• Conversion of degraded feedstocks using novel technologies</li> </ul>
	<b>Key Project Activities:</b>
	<ul style="list-style-type: none"> <li>• Commissioning of 2 million litre pa Biodiesel facility in Auckland</li> <li>• Export of Magnesol Dry Wash System to Australia</li> </ul>
	<b>Leading Edge:</b>
	<b><i>Strong technical team with proven ability to deliver practical and cost effective solutions.</i></b>
<b>Investment Base:</b>	
<ul style="list-style-type: none"> <li>• UK Investors</li> <li>• NZ Investors</li> </ul>	
<b>Employees:</b>	
<ul style="list-style-type: none"> <li>• 4</li> </ul>	
<b>Production Capacity</b>	
2 million litre pa
